FS ASSIGNMENT – 1

Roll Number: A24126552163

Class: 3/4 CSM-C

1. Design an HTML Web Page (Static)

Title: Online Course Registration Web Page

Aim: To design and develop a professional static web page for online course registration using HTML5 elements.

Software Requirements: Visual Studio Code and a web browser.

Program

```
<!DOCTYPE html>
<html lang="en">
<head>
   <meta charset="UTF-8">
   <meta name="viewport" content="width=device-width, initial-scale=1.0">
   <title>Online Course Registration</title>
</head>
<body>

<header>
   <h1>TechLearn Academy</h1>
   <p>Enhance Your Skills Through Professional Courses</p>
</header>

<nav>
   <a href="#home">Home</a> |
   <a href="#courses">Courses</a> |
   <a href="#registration">Registration</a> |
   <a href="#contact">Contact</a>
</nav>

<main>
   <section id="home">
      <h2>Welcome to TechLearn Academy</h2>
      <p>TechLearn Academy provides industry-oriented courses
      to help students develop technical and professional skills.</p>
   </section>
```

```
<section id="courses">
   <h2>Available Courses</h2>
   <table border="1">
      <tr>
         <th>Course Name</th>
         <th>Duration</th>
         <th>Mode</th>
      </tr>
      <tr>
         <td>Python Programming</td>
         <td>8 Weeks</td>
         <td>Online</td>
      </tr>
      <tr>
         <td>Web Development</td>
         <td>10 Weeks</td>
         <td>Online</td>
      </tr>
      <tr>
         <td>Artificial Intelligence</td>
         <td>12 Weeks</td>
         <td>Online</td>
      </tr>
   </table>
</section>

<section id="registration">
   <h2>Course Registration Form</h2>
   <form>
      <label for="name">Full Name:</label>
      <input type="text" id="name" required><br><br>

      <label for="email">Email Address:</label>
      <input type="email" id="email" required><br><br>

      <label for="phone">Phone Number:</label>
      <input type="tel" id="phone" required><br><br>

      <label for="course">Select Course:</label>
      <select id="course">
         <option>Python Programming</option>
         <option>Web Development</option>
         <option>Artificial Intelligence</option>
```

```
            </select><br><br>

            <input type="submit" value="Register">
            <input type="reset" value="Clear">
        </form>
    </section>
</main>

<footer>
    <p>&copy; 2026 TechLearn Academy. All Rights Reserved.</p>
</footer>

</body>
</html>
```

Result: A professional static Online Course Registration Web Page was successfully designed using HTML5 elements.

OUTPUT:

2. Types of CSS

Aim: To study and implement the different types of Cascading Style Sheets used for styling HTML webpages.

2.1 Inline CSS

Inline CSS is applied directly to an HTML element using the style attribute.

```
<h1 style="color: blue; text-align: center;">Welcome to TechLearn Academy</h1>
```

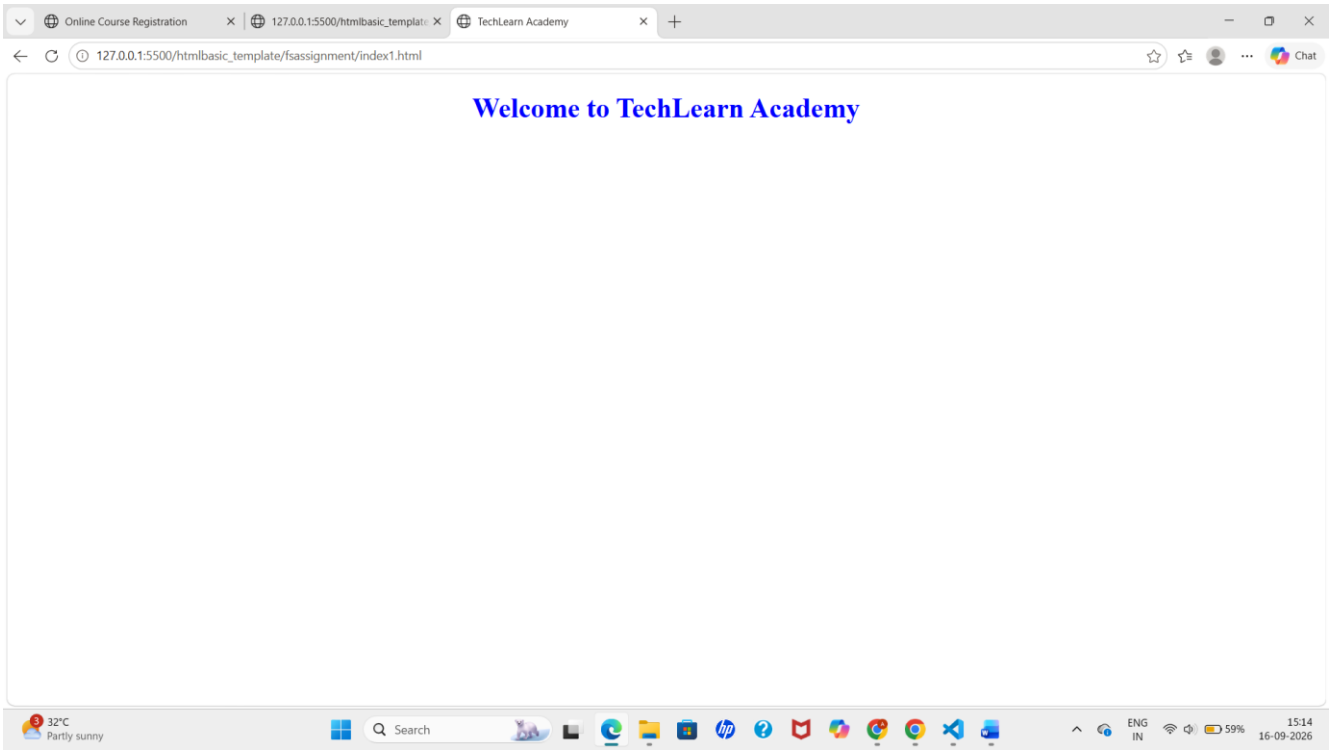

Advantages: Easy to apply to an individual element.

Disadvantage: Difficult to maintain in large projects.

PROGRAM:

```
<!DOCTYPE html>
<html lang="en">
<head>
   <meta charset="UTF-8">
   <meta name="viewport" content="width=device-width, initial-scale=1.0">
   <title>TechLearn Academy</title>
</head>
<body>
 <h1 style="color: blue; text-align: center;">
      Welcome to TechLearn Academy
 </h1>
</body>
</html>
```

OUTPUT:

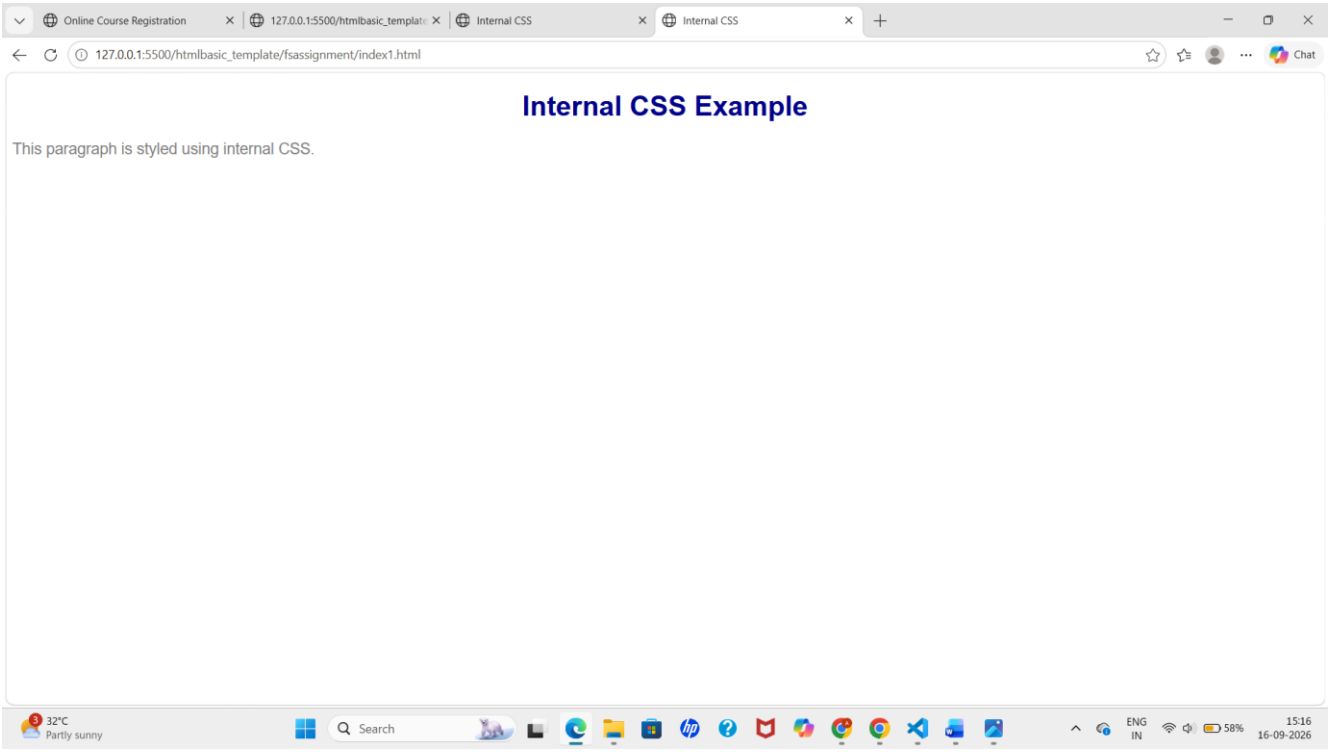

2.2 Internal CSS

Internal CSS is defined inside the <style> element within the <head> section.

PROGRAM:

```
<!DOCTYPE html>
<html>
<head>
   <title>Internal CSS</title>
   <style>
      body { font-family: Arial, sans-serif; }
      h1 { color: darkblue; text-align: center; }
      p { font-size: 18px; color: gray; }
   </style>
</head>
<body>
   <h1>Internal CSS Example</h1>
   <p>This paragraph is styled using internal CSS.</p>
</body>
</html>
```

OUTPUT:

2.3 External CSS

External CSS is written in a separate .css file and linked to the HTML document.

PROGRAM:

HTML File: index.html

```
<!DOCTYPE html>
<html>
<head>
    <title>External CSS</title>
    <link rel="stylesheet" href="style.css">
</head>
<body>
    <h1>External CSS Example</h1>
    <p>This page uses an external CSS file.</p>
</body>
</html>
```

CSS File: style.css

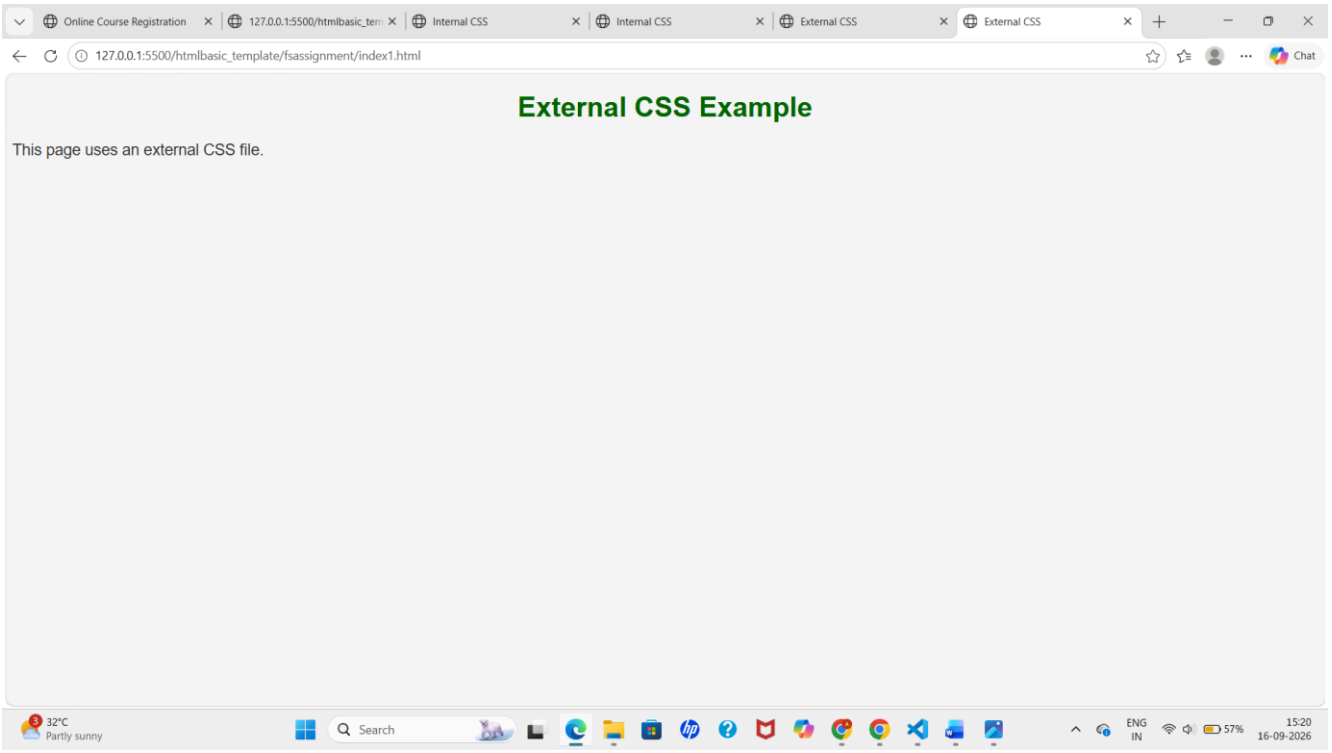

```
body {
    font-family: Arial, sans-serif;
    background-color: #f4f4f4;
```

```
}

h1 {
    color: darkgreen;
    text-align: center;
}

p {
    color: #333333;
    font-size: 18px;
}
```
